

WIND SUCTION INSECT KILLER LAMP

Product Introduction

Zhice Yunlian suction-type insect killing lamp is an eco-friendly pest control device that combines traditional and modern technologies. It attracts insects via lure light and eliminates them internally.

It kills pests of all sizes, suppresses populations, and supports green prevention. Widely used in agriculture, forestry, horticulture, livestock, and sanitation, it enhances control in fields, gardens, and orchards. Features light control and adjustable working time.

Product Features

1. Uses lure light and negative pressure airflow, not limited by insect size, covering a wide range.
2. Light control: auto off daytime, on at night with adjustable duration.
3. Time control: on within set period, off otherwise; lamp off in sleep mode but communication stays active.
4. Rainproof design ensures operation in wet weather.
5. Simple lightweight structure with lamp body and bracket, easy to install and transport.
6. Spacious insect chamber with drawable net tray for easy cleaning; large capacity reduces frequency of dumping.
7. Single-lamp control radius: $\geq 120\text{m}$ for farmland, $\geq 80\text{m}$ for forest.
